23rd January 2019

Dear Parents

As part of our topic on Inventors and inventions, we will shortly be undertaking an exciting DT project. The children will be designing and building a model of an imaginary new invention. The model will contain a working electrical circuit, which we will aim to control using computer coding software.

I would really like the children to see a real purpose to the project and I feel that it is important that they can take home and keep a finished product at the end of the unit, including all of the circuit components (bulbs, wires, switches, motors etc.), batteries and other materials.

In order to achieve this, we would like to ask for a small, voluntary contribution of £5.00 from parents. As previously advised due to banking restrictions we will no longer be able to accept cash for trips and activities, therefore all payments are to be made via **pmx.parentmail.co.uk**.

Once you have signed into Parentmail select the 'Payments' option, here you will be able to view payments due in either 'To Pay' or the 'Shop'. Simply click on the **Y4 – DT project** payment selecting each child as appropriate. Your item will go into your 'Shopping cart/basket' where you will be asked to click to consent and complete your purchase. We would be really grateful if contributions could be made by Friday 1st February so that we have plenty of time for the materials to arrive.

I hope that you will be happy to support this project but please don't hesitate to contact me if you have any questions or concerns.

Mr Baird
Y4 Class teacher
